

ISO 23317:2012

Implants for surgery -- In vitro evaluation for apatite-forming ability of implant materials

This standard has been revised by: **ISO 23317:2014**

Abstract

[Preview ISO 23317:2012](#)

ISO 23317:2012 specifies a method for detecting apatite formed on a surface of a material in simulated body fluid (SBF). It is applicable to implant surfaces intended to come into direct bone contact.
